Art Unit: 3714

#### **DETAILED ACTION**

#### Specification

1. All objections to the specification have been overcome by Applicant and are hereby withdrawn.

## Information Disclosure Statement

2. All objections to the Information Disclosure Statement are hereby withdrawn.

#### **Drawings**

3. The drawings are objected to because of the issues noted on the attached Notice of Draftsperson's Patent Drawing Review. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

#### Claim Rejections - 35 USC § 102

- 4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
  - A person shall be entitled to a patent unless -
  - (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1-4, 6-9, 22-25, 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Don Best Sports.
  - Claims 1, 6, 11, 22: Don Best Sports provides sporting event odds and information for sports books in substantially real time. The DBS2K program uses the Internet to provide real time odds and information. Don Best Sports provides a means giving an alert when a predetermined occurrence takes place in connection with the odds. (Line Move Alerts.)

Art Unit: 3714

Don Best Sports provides a means for logging and tracking bets. (Bet Tracker) It provides a means for display of this information (i.e., computer monitor). There is a means for navigating the display in order to acquire information – see DBS Premium Service sample page. Applicant admits that Don Best Sports allows for the display of odds to be manipulated for more efficient use.

Claims 2, 23: Don Best Sports offers a Line Seeker feature that provides an alert when predetermined odds on a particular game are offered by a sports book.

Claims 3, 24: Don Best Sports provides a Line Move Feature that provides notification when the odds offered by a sports book change by a predetermined amount within a predetermined amount of time.

Claims 4, 9, 20, 25, 28: The DBS Premium Service sample page shows a menu made up of various buttons and the buttons are equipped with pull down menus.

Claim 7: Don Best Sports Bet Tracker allows the user to enter a bet and bet amount and provides a means for determining whether the bet was won or lost.

Claim 8: Don Best Sports Bet Tracker calculates and logs winnings and losses.

Claim 12: The DBS Premium Service sample page shows the display of casino columns.

These appear to be customizable in that the user can choose to display different casino columns.

Claim 13: The DBS Premium Service sample page shows horizontal and vertical scrolling bars.

Claim 27: Don Best Sports provides sporting event odds and information for sports books in substantially real time. The DBS2K program uses the Internet to provide real

time odds and information. Don Best Sports provides a means giving an alert when a predetermined occurrence takes place in connection with the odds. (Line Move Alerts.) Don Best Sports provides a means for logging and tracking bets. (Bet Tracker) It provides a means for display of this information (i.e., computer monitor). There is a means for navigating the display in order to acquire information – see DBS Premium Service sample page. Applicant admits that Don Best Sports allows for the display of odds to be manipulated for more efficient use. Don Best Sports offers a Line Seeker feature that provides an alert when predetermined odds on a particular game are offered by a sports book enabling the user to get the information needed automatically.

### Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claims 5, 10, 21, 26, 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Don Best Sports as applied to claim 1, 6, 11, 22, or 27 above, and further in view of Zinda et al. (US Patent Number 6,393,437).
  - Claims 5, 10, 21, 26, 29: Don Best Sports and Internet Explorer® teach the invention substantially as claimed. According to Applicant's disclosure, Don Best Sports is written in Java and not in C++. Java and C++ are extremely well known equivalents. Zinda, a patent concerning web development techniques, teaches that either language may be used

Art Unit: 3714

to develop web-based applications. (Col 4, 7-11) It would have been obvious to one of ordinary skill in the art at the time of the invention to have used the C++ programming language instead of its well know equivalent Java in order to achieve the same functionality.

- 8. Claims 14-19 rejected under 35 U.S.C. 103(a) as being unpatentable over Don Best Sports as applied to claim11 above, and further in view of the Human Factors Design Guide.
  - Claim 14: Don Best Sports teaches the invention substantially as claimed. Don Best Sports does not, however, specifically teach a feature that turns a page every five seconds. The Human Factors Design Guide (page 8-46) states that "if automatically changing data must be read reliably and accurately, the rate of update should not be more than once per second." It would have been obvious to one of ordinary skill in the art at the time of the invention to have turned the page every five seconds in order to allow the information to be read reliably and accurately.
  - Claims 15 & 18: Don Best Sports teaches the invention substantially as claimed. Don Best Sports does not, however, specifically teach using a color-coded display. The Human Factors Design Guide (page 8-50) states that color-coding (including highlighting) should be used to direct a user's attention to something. It would have been obvious to one of ordinary skill in the art at the time of the invention to have used color-coding or highlighting to direct the user's attention to the display of odds.
  - Claim 16: Don Best Sports teaches the invention substantially as claimed. Don Best Sports does not, however, specifically teach moving the casino column by the click and drag method. The Human Factors Design Guide (page 8-62) teaches the click and drag

method of moving windows. This allows the user to take advantage of the pointing device (mouse) to move the window. It would have been obvious to one of ordinary skill in the art at the time of the invention to have used the click and drag method to move the casino columns in order to allow the user to take advantage of the pointing hardware.

Claims 17 & 19: Don Best Sports teaches the invention substantially as claimed. Don Best Sports does not, however, specifically teach resizing the casino columns to a custom setting. The Human Factors Design Guide (page 8-62) teaches allowing the user to resize windows. This allows the user to make the window the size the user prefers – including abbreviating the window to allow more windows to be displayed (i.e., more columns per page). It would have been obvious to one of ordinary skill in the art at the time of the invention to have allowed the user to resize the casino columns (including abbreviating the column to allow more columns to be displayed per page), so that the user can make the windows suit the user's preferences.

Page 6

9. The Declaration under 37 CFR 1.132 filed 7 February 2003 is insufficient to overcome the rejection of claims 1-26 based upon Don Best Sports as set forth in the last Office action because: The declaration does not address the claimed subject matter. While Applicant goes to great length to describe how the current invention differs from the reference by downloading information that the reference does not, this feature is not claimed. The reference clearly discloses the **claimed** features. Applicant's discussion of the capabilities of JAVA and C++ is not convincing. These languages are well known to have equivalent functionality – as described in Zinda.

Application/Control Number: 09/899,711

Art Unit: 3714

#### Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Corbett B. Coburn whose telephone number is (703) 305-3319. The examiner can normally be reached on 8-5:30, Monday-Friday, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Hughes can be reached on (703) 308-1806. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9302 for regular communications and (703) 872-9303 for After Final communications.

Application/Control Number: 09/899,711

Art Unit: 3714

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1148.
